

Web Design Timeline

Current as of 02/2009

Provided by:

KBH Web Marketing

✓ Average Time

<u>Service</u>	<u>Estimated Hours</u>
New Website Design	20-30
Website Redesign	10-20
Future Maintenance	Specific to Your Needs

✓ General Timeline

My focus for your custom website will be to construct a clean and professional design based on your preferences and requirements. Please see the expected workflow for your design below:

1. You will be asked to provide logos, pictures, content, web host and domain logins and any other pertinent information to KBH.
2. An initial custom home page design will be constructed and presented to you for approval.
3. Any changes or modifications you have requested will be completed.
4. A revised custom home page design will be presented to you for approval.
5. Once approved, your website will require 1-2 weeks to construct.
6. Your complete website (all pages) will be presented to you for approval.
7. Any changes or modifications you have requested will be completed.
8. A revised complete website will be presented to you for approval.
9. Once approved, your website will go "live" (uploaded to your web hosting server).

Please note, the hours and timeline listed above are based on our previous history and may not apply to your project. Your web design project may require more or less time than what has been indicated above. The timeline provides a general outline, which may deviate from your actual timeline.
